NEW STRATEGIC LOCATION PUTTING SCA AT 10 DEGREES SOUTH.

We are excited to announce that we have in-principle secured additional commercial land to support Space Centre Australia’s ongoing development and future operations. Utingu is a unique commercial property located at the tip of Queensland within the Torres Strait Island Council region.

This new location will place SCA as one of the closest facilities to equatorial launch access in the Asia Pacific region and will provide additional launch profiles which, subject to completion conditions, will enable us to offer a broader range of services to a wider market such as Northern Sun-Synchronous Orbit (SSO) through to Easterly Low Earth Orbit (LEO) whilst maintaining the highest possible environmental and safety standards.
