SCA AND GAMBARA KAHA DC PARTNER TO DELIVER SOVERIGN CLOUD INFRASTRUCTURE TO FAR NORTH QUEENSLAND

Indigenous-Based Business Gambarra Kaha ANZ DC and Space Centre Australia Forge Historic Long-Term Contract for Sovereign Cloud Data Centres.

Brisbane, Queensland - Gambarra Kaha ANZ DC, a prominent Indigenous data centre development company, and Space Centre Australia, a leader in space launch and space-based infrastructure development, are pleased to announce the signing of a ground-breaking long-term agreement. This historic contract, executed in November, marks the initiation of a pioneering initiative aimed at creating secure sovereign cloud data centres tailored to the Space, Defence, and Government sectors. The collaboration seeks to provide prime real estate land for secure data centre development, support Space Centre Australia's operations, and deliver sovereign cloud-based capabilities to Defence, Government, and Commercial stakeholders.

This innovative partnership leverages Space Centre Australia's access to high-bandwidth in-orbit satellite communications and terrestrial fibre networks, enabling the development of cutting-edge remote data centre infrastructure. These facilities will offer competitive, secure, sovereign cloud-based solutions centralized in Far Northern Queensland.

Key Objectives of the Agreement:

1. **New Infrastructure Projects for the Far North:** Multiple data centre facility development projects in various sizes and locations across Far North Queensland, generating new opportunities for construction, contracting, and employment.
2. **New Opportunities for Remote and Indigenous Communities:** The development of data centre facilities in strategic locations across Far North Queensland will create new opportunities for remote and regional Indigenous communities in emerging industries.
3. **Sustainable Energy Infrastructure:** The agreement includes the development of sustainable and environmentally friendly energy infrastructure to power the data centre facilities.
4. **Economic Growth and Job Creation:** By fostering technological innovation, creating jobs, and positioning Northern Queensland as a leader in the ICT and Space Industries, the collaboration aims to stimulate economic growth in the region.

Michael Dickerson, CEO of Gambarra Kaha ANZ DC, expressed his enthusiasm for this unique agreement, stating, "This highlights the growing capability of collaboration between Indigenous-led businesses and the wider community, with the sky no longer being the limit for these engagements. As we tackle the final frontier with our partners Space Centre Australia, Gambarra Kaha is delighted to bring high-technology jobs, Sovereign Cloud Infrastructure with our partners Dickerson Digital, enabling an ecosystem that supports Space Centre and satellite services in Far North Queensland. This truly brings together a circular-based approach to business in-country, on-country, and with country."

James Palmer, CEO of Space Centre Australia, also expressed excitement, emphasizing that this agreement represents a first-of-its-kind opportunity for both organizations. Once the first data centre is commissioned, Space Centre Australia will become a provider of sovereign secure cloud-based products to serve a wide variety of local and regional customers. Additionally, the agreement highlights the diverse opportunities that can be leveraged through the space ecosystem, including satellite ground stations and Low Earth Orbit (LEO) satellite constellations. Space Centre Australia's future capabilities in the space industry will provide an end-to-end market solution, opening opportunities for like-minded businesses, customers, and communities to benefit and thrive.

About Gambarra Kaha DC: Gambarra Kaha DC is a leading Indigenous data centre development company committed to fostering innovation, job creation, and economic growth in Queensland and beyond. For more information, visit www.gambarrakaha.com.
