

SPACE CENTRE AUSTRALIA JOINS THE INTERNATIONAL ASTRONAUTICAL FEDERATION

Space Centre Australia is proud to announce its recent approval as a member of the prestigious **International Astronautical Federation (IAF)**, marking a significant milestone in our commitment to advancing global space exploration and industry collaboration.

The IAF, founded in 1951, is the world's leading space advocacy body, fostering international cooperation and promoting the sharing of knowledge across the space sector. Membership opens avenues for Space Centre Australia to engage with the global space community, contributing to key discussions on innovation, sustainability, and the future of space exploration.

"Becoming a member of the IAF underscores our dedication to excellence and collaboration within the international space sector," said CEO James Palmer. *"We look forward to contributing to the IAF's vision, sharing insights from Australia's growing space industry, and building new partnerships on a global scale."*

Space Centre Australia's inclusion in the IAF also reinforces its role in supporting Australia's national goals in space, aligning with our mission to establish Cape York as a premier launch and innovation hub.

About Space Centre Australia:

Space Centre Australia is at the forefront of developing cutting-edge infrastructure and services for the space industry, including launch capabilities, technology research, and space tourism initiatives. Our aim is to position Australia as a leader in the global space race, contributing to sustainable exploration and economic growth.
